Protecting your Tomorrow

RVsecure

Cable Loop Sensor

Protection for your portable gear at the campsite!

FEATURES

- Gen3 Compatible
- Security Sensor
- Cable Cut Detection
- Removal Detection
- 2.2m or 4.4m available

How it Works: Simply run the cable through the items you wish to protect, pull the base through the loop and place in holder. If the base is removed from the holder or the cable is cut, the base sends a signal to your RVsecure Security System and the alarm is activated.

for Bikes, Generators, Gas Bottles, Jerry Cans, Portable Fridges, Spare Wheels, Camp Gear
